### **DETAILED ACTION**

1. Applicant's Application filed on July 14, 2003 has been reviewed.
2. Claims 1-18 are presented for examination.

#### ***Drawings***

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002

Art Unit: 2165

do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Berke US Patent No. 6,629,092.

generating a proposal based on the desired product configuration [38, 40, 41 of fig. 3; ab].

As to claims 9 and 14, all limitations of these claims have been addressed in the analysis above, and these claims are rejected on that basis.

As to claim 2, Berke teaches the invention substantially as claimed. Berke further teaches the at least one of selected product and usage information is one of the group consisting of a product detail, a product cost, a supply cost, a product type, and a product model [fig. 4; col. 6, lines 66 to col. 7, lines 13].

As to claim 3, Berke teaches the invention substantially as claimed. Berke further teaches selectively prompting the user to input information into predetermined fields [col. 5, lines 31-38; col. 6, lines 43-51].

As to claim 4, Berke teaches the invention substantially as claimed. Berke further teaches that the inputting a proposal summary further comprises entering a benefits summary [inherent in the system].

As to claim 5, Berke teaches the invention substantially as claimed. Berke further teaches that the solution configuration comprises pricing information [inherent in the system].
